PROFESSIONAL SUMMARY:

A product-focused Full-Stack Web Developer with strong experience in building scalable, high-performance applications. I specialize in transforming complex business requirements into clean, efficient, and user-centric web solutions. With a solid background in both frontend and backend development, I deliver robust systems that enhance user engagement and streamline business operations. Known for leading end-to-end development cycles in agile environments, improving performance, reducing development time, and contributing directly to measurable business growth.

AREAS OF EXPERTISE:

- Full-Stack Web Development
- Frontend Development (React , React Native ,Vue, JavaScript , HTML ,CSS)
- Backend Development (Laravel, Node.js, PHP…)
- Responsive Web Design
- Database Design & Management (MySQL, PostgreSQL…)
- (Git & GitHub)

PROFESSIONAL EXPERIENCE:

- ***Full-Stack Developer — Attijariwafa Bank : <u>Internship March 2025</u>***
  - Developed a **parameterized questionnaire project** for employees using **Laravel, React, REST API, and MySQL**.
  - Implemented dynamic forms with customizable parameters to streamline internal data collection.
  - Ensured responsive UI/UX for seamless user interaction.
  - Collaborated with the team to integrate backend APIs with frontend components efficiently.
  - Applied best coding practices, version control, and database optimization for performance and scalability.

- ***Freelance web developer* & Designer**: *Self-Employed | Remote (Fiverr)*

- Designed and developed **static websites** for clients using **React and Tailwind CSS**.
- Created modern and responsive **web designs** focused on usability and visual consistency.
- Delivered freelance **digital services on Fiverr**, including website creation, basic customization, and content-related tasks (e.g. translation).
- Collaborated with clients to understand requirements and provide tailored solutions.
- Ensured clean structure, responsive layouts, and cross-browser compatibility.
- Managed multiple small projects with respect to deadlines and client expectations.

Education:

- ***Specialized Technician in Digital Development – Full Stack***

  - ***OFPPT · ISTA Hay Hassani 1***
    2023 – 2025
  - Full-stack training covering PHP/Laravel, JavaScript, React, MySQL, software architecture, and agile project management.

- ***Baccalaureate in Life & Earth Sciences — with Honors***

  - ***Lycée Mohamed El Zargatouni, Rahma***
    2022 – 2023

Certifications:

- ***Python Certification — Coursera***
- ***Cybersecurity Certification — O'Reilly***
- ***CCNA — Cisco***

Projects:

- ***Smart Menu – Restaurant Ordering & Management System***

  - Designed and developed a complete **smart digital menu system** for restaurants.
  - Implemented **QR code scanning** allowing customers to scan the table QR code and instantly access the menu.
  - Enabled customers to browse meals by categories, place orders, and **track order status in real time**.
  - Built an **admin dashboard** for restaurant owners to manage tables, meals, categories, prices, and orders.
  - Implemented **unique QR codes for each table**, generated and managed by the restaurant owner.

- Developed a **subscription-based model** with **Free** and **Premium** versions.
- Integrated **Stripe payment gateway** for secure online subscription payments.
- Designed responsive and user-friendly interfaces for both customers and restaurant owners.
- Ensured smooth communication between frontend and backend via REST APIs.

- **Key Features:** QR Code Menu, Order Tracking, Admin Dashboard, Subscription System
  Technologies: Laravel, React.js, MySQL, REST API, Stripe

- ***Chouf Rap – Moroccan Rap Music Platform***

  - Designed and developed a scalable web platform dedicated to promoting **Moroccan rap culture**.
  - Built a structured system for managing **artists, songs, albums, and playlists**.
  - Implemented **role-based access control** (admin, artist and user) to manage platform permissions.
  - Developed an **admin dashboard** for content moderation and platform management.
  - Enabled users to create and manage personalized playlists.
  - Designed and implemented **RESTful APIs** to ensure efficient frontend-backend communication.
  - Structured relational database models to handle large music catalogs efficiently.
  - Focused on performance, maintainability, and clean code architecture.
  - Designed responsive and user-friendly interfaces for an optimal user experience.

  - **Project Value:** Cultural promotion, scalable music management platform, real-world use case
    Technologies: Laravel, React.js, MySQL, REST API

- ***Questionnaire Parameter Management System – Dynamic Form Platform***

  - Designed and developed a **web-based system** for creating and managing dynamic questionnaires.
  - Implemented **configurable parameters** for questions, answers, and forms to adapt to different use cases.
  - Built a **user-friendly dashboard** for admins to create, edit, and monitor questionnaires in real time.
  - Enabled **role-based access** to allow admins and standard users to manage or respond to questionnaires.
  - Integrated **RESTful APIs** for seamless communication between frontend (React.js) and backend (Laravel).
  - Designed database structure to handle complex relationships between questionnaires, questions, and answers.
  - Focused on performance, maintainability, and **scalable system design**.
  - **Project Value:** Efficient dynamic data collection, configurable questionnaires for various use cases
    Technologies: Laravel, React.js, MySQL, REST API
